CS 19300 / HOMEWORK 9 / SECTION 2.1

Midnight Grader

Eisenhower matrix for a Java program that checks practice quizzes.

	Urgent	Not urgent
Important	**Do** Build in the first version • Load an answer key and student answers. • Compare answers and calculate a score. • Display and export the results.	**Schedule** Plan for a later version • Grade multiple quizzes in one run. • Support questions worth different points. • Show results from previous attempts.
Not important	**Delegate** Use existing Java libraries • Use Java's standard library for file reading and writing. • Use Scanner for console input. • Use Java's formatting tools for percentages.	**Delete** Leave out of the project • Handwriting recognition. • AI grading of essays. • Accounts and cloud syncing.
